

Deep-Systems Healing: A Weekend to Unlock your Higher Potential

Ein Wochenende zur Freisetzung deines höheren Potenzials

Munich, 3 - 4 March 2012

with Stephen Busby (in English)

Many people feel their higher potential is out of reach: they feel blocked, aware of patterns and repetitive behaviours and they long to manifest more in their life. In this weekend we will use a new approach to transformation called Deep-Systems Healing. This is a powerful combination of innovations in systemic constellation work, research in embodied intelligence, evolutionary potential and healing movements. **You may bring to the weekend any personal or professional question, issue or concern you have** in order to identify underlying dynamics which prevent you from finding resolution and from moving into your fuller life-potential. You will gain insight into habitual behaviours and into what holds you back, helping to free you for instance from systemic influences, illness or addictions.

We will work in basic English, sometimes providing minimal German translation when required.

Creatively exploring whole pictures (or systems) helps people find fulfilment in relationships and intimacy, family, parenting and health, leadership and innovation-potential, decision-making and conflict, for example. Hidden information, connections and consequences are revealed, often with openings, insights and healing. This approach points to the future where larger life-themes and purposes await us. It brings an understanding of where and how we need to act next and helps us face our choices with a deeper awareness of the whole picture, leading to more sustainable outcomes and holistic solutions.
